Btec courses sixth form

If you don't pass enough Year 11 exams to go on to a Level 3 course, you can learn more qualifications in sixth form: more Level 2 courses (GCSE and Level 2 BTCS). Level Single, Double or Extended Level 3 CTIC/BTECs Cambridge Pre-U International Baccalaureate (IB) Qualification Framework Higher Education Qualification Level 8 PhD Level 7 Master's Level: MA, MSc, MPhil Graduate Certificate & Diploma: for example. PG Cert in Education Chartered Professional Qualifications Master Level 6 Bachelor's Degree: BA, BSc, LLB Postgraduate Certificate and Diploma Level 5 Foundation Degree HND and Dip HE Professional Technical Quote HE&HNC NVQ Level 4 Level 3 AS/A Level International Baccalaureate (IB) Access OCR National C&G Advanced NVQ 3 Advanced Apprenticeship Level 2 GCSE 9-9 4 BTEC First & NVQ 2 Apprenticeship Level 1 GCSE 3-1 BTEC Introductory C&G Foundation NVQ 1 Vocational Qualification Certified Life Skills Bachelor Qualification Vocational Qualification Apprenticeship (work-based) It is a good idea to increase level 2 courses Qualifications to prepare really well for level 3 courses, which is the next step. If you get 3 or less, you are required by law to continue studying English and maths GCSEs. If you seem to be trying to achieve four or less GCSEs or equivalent, including English and maths, you should continue your studies at level 2. You can learn GCSE or BTCS at level 2. We recommend that you apply to study at a sixth-form university that specializes in Harris Professional Skills or Level 2 qualifications and provide a Level 3 CTCS/BTCS. A career advisor will help advise you on this. Your tutor will help you make reservations to see them. Level 3 Course A Level These are Level 3 academic qualifications. Students currently only have linear A-levels. Linear A-levels are where the final mark is awarded in exams (sometimes coursework) at the end of 13 years. In Harris' sixth form, he chose to take an internal exam at the end of year 12 so that everyone could understand the level at which students were working. At the beginning of year 12, choose three (sometimes four) single subjects. Harris' sixth form will be formally examined on internal exams for all subjects at the end of year 12. The level is good for the following people: those who love the subjects they choose and are willing to study these subjects independently, not only outside of class, but also at lesson time. Those who expect to achieve at least Grade 6 in related subjects. Those expecting to get a minimum of seven 9-4 grades at GCSE, including English and maths. a person who is thinking of going to university and studying practical subjects. Those who are willing to be inspected on their subject and don't mind the pressures of revisions and coursework deadlines. Level 3 CTCS/BTCS These are level 3 vocational qualifications. You can enter universities with these qualifications and most universities are very happy to accept them. Russell Group universities usually prefer levels, and it's always a good idea to do research and talk to career advisors before choosing the final subject. CTIC/BTIC is good for those who have already passed at least four level 2/GCSE courses in grades 9-4 or higher, including English and maths. Those who love their

subjects and enjoy applying their knowledge in a practical way. Those who enjoy coursework rather than exams. Those who expect to achieve at least grade 4 or equivalent in the relevant subjects. Those who are thinking of going to university to study vocational or practical subjects such as business, health or social care. The course lasts for two years and has an exam component. You need to remain in school throughout the course or you can leave without qualifications. You can't leave after a year and still qualify. To pass the entire qualification, you must pass the exam component. You can choose a single CTEC/BTEC known as an extension certificate (equivalent to one A-level after two years), a double CTEC/BTEC known as a diploma (equivalent to two A-levels after two years), and a triple CTEC/BTEC (equivalent to three A-levels after two years) known as an extended diploma. Example 1: Block A Block B Block C Business Research CTEC Extension Certificate Business Research CTEC Diploma Health and Social Care CTEC Extended Certificate Example 2: Health and Social Care Diploma (2x Health and Social Care) Media Research Extension Certificate (1x Art) Block A Block B Block C Health Social Care CTEC Extension Certificate Health and Social Care CTEC Diploma Media Research Many students who combine CTEC extended certificate levels with CTIC/BTIC choose to study the CTIC/BTIC and A-level combinations, which works really well for most students. Most universities are willing to accept students who are studying combinations. An exception to this can be some high-level courses at Russell Group universities and other top universities, three full A-levels may be required. This combination is good for people who do not have minimum academic requirements to take 3A levels. Who wants the security of doing a professional subject you can be more confident qualified at the end of two years. What is the difference between A-level and occupation? The main difference between A-levels and CTECs/BTECs is how they are coached and evaluated at the end of the course. Both are difficult in different ways and level 3 does not have an easy option. Level A levels are academic. To prepare for class, you need to read a lot of material during the study period and at home. In many cases, you will need to write many essays (especially writing-based subjects) and complete other assessments. You are tested every half term in a mock exam. In the same way that GCSE exams were examined, coursework for subjects that are mainly inspected in May/June at the end of year 13 must be carried out. You'll end up with grade A*-E (unless you fail and get a U grade). Russell Group universities like A-levels. CTIC/BTCS These are more practical. Study the unit of work you must pass in order to advance to year 13. The course consists primarily of coursework, but there are currently inspected components that must be passed to achieve overall qualification. These courses are very difficult because each unit's final assignment allows only one attempt. Grade distinctions like CTECs/BTIC* end with a pass, but not for competitive academic courses such as English or math. Business BTEC is a practical, work-related course. The responsibility for investigating and completing projects based on realistic working conditions is great. This is a very useful course if you want to enter the business world or ultimately run your own business. Learn why organizations such as Tesco and Microsoft are successful and how they respond to a variety of external pressures. You will learn some local, national and global business. In addition, you're given the opportunity to set up your own business and address the challenges of the companies that support development. In the second year, you can manage the college's business events. We have many links with Staffordshire University and Staffordshire University Hospital, which provide rich activities and open days throughout the year, exposing you to various job opportunities and university-level lab-based work at the university's brand new science centre. Joseph Chamberlain College is holding a virtual open evening for adult learning. Date and time: Tuesday, January 12, 2021 For more information, Joseph Chamberlain College is holding a virtual open event for 16-18 students. Date: Tuesday, January 19, 2021 Learn more
